Frontend intro

(React, Angular, Vue, etc)

Create an upload dialog box

Mockup for this feature:

File upload

HTML - browser markup language

```
<!DOCTYPE html>
<html class="client-js ve-not-available" dir="ltr" lang="en"> event
▼ <body class="mediawiki ltr sitedir-ltr mw-hide-empty-elt ns-0 ns-subject page-Main Page rootpage-Main Page skin-vector action-
 view"> event
   <div id="mw-page-base" class="noprint"></div>
   <div id="mw-head-base" class="noprint"></div>
 w<div id="content" class="mw-body" role="main">
     <a id="top"></a>
   w<div id="siteNotice" class="mw-body-content">
       <div id="centralNotice"></div>
       <!--CentralNotice-->
     </div>
   w <div class="mw-indicators mw-body-content">
     </div>
     <h1 id="firstHeading" class="firstHeading" lang="en">Main Page</h1>
   w <div id="bodyContent" class="mw-body-content">
       <div id="siteSub" class="noprint">From Wikipedia, the free encyclopedia</div>
       <div id="contentSub"></div>
       <div id="jump-to-nav"></div>
       <a class="mw-jump-link" href="#mw-head">Jump to navigation</a>
       <a class="mw-jump-link" href="#p-search">Jump to search</a>
     > <div id="mw-content-text" class="mw-content-ltr" dir="ltr" lang="en"> ... </div>
     <div id="catlinks" class="catlinks catlinks-allhidden" data-mw="interface"></div>
       <div class="visualClear"></div>
     </div>
   </div>
 \div id="mw-navigation"> \cdot </div>
 \div id="footer" role="contentinfo"> ... </div>
 \ <script> \end{aligned}
 \ div class="suggestions" style="display: none; font-size: 13px;"> ... </div>
 \div id="mwe-popups-svg"> ... </div>
 </body>
</html>
```

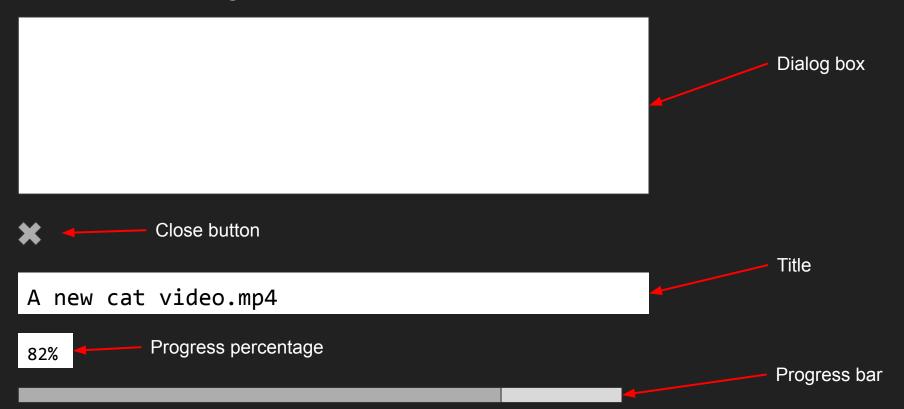

File upload

A new cat video.mp4

Component-based approach:

- Split HTML into functional pieces components
- Encapsulate each piece in a component
- Give each component instructions to display data

Upload dialog in components

Put it together

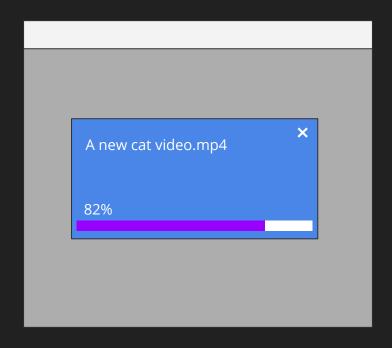

A new cat video.mp4

Added styling (CSS)

A new cat video.mp4

82%

Browser rendered it!

What else is frontend?

Alright

- Acquiring mockups from a UX person
- 2. Roughly building and styling each core component
- 3. Composing/rendering components
- 4. Checking with the UX person
- 5. Correcting, restyling, adding minor components
- 6. Wiring up data sources
 - building API services
 - binding services to a frontend storage
 - binding storage to components
- 7. Checking with the UX person
- 8. Styling, correcting components
- 9. Writing tests to prove work of
 - separate components
 - the feature
- 10. Deploying the feature
